Technologies

Languages: Python, C++ , JavaScript

JavaScript Libraries/Frameworks: ReactJS, Next.js ,NestJS, NodeJS, ExpressJS

Python Libraries/Frameworks: NumPy, Pandas, Langchain, Pydantic, Flask, FastAPI, FastMCP

Containerization tool: Docker

Version Control: Git / GitHub

Cloud Platform: Amazon Web Service (SES, CodePipeline, EBS, S3, EC2)

Experience

Associate Engineer, KPIT Technologies

Sept 2025 – Present

- Contributed to **Android BSP migration for automotive IVI platforms**, working across critical system components.
- Developed **AI driven automation workflows** to streamline Android migration tasks and reduced the latency by **50%**
- Tools Used: Python, FastMCP, FastAPI

Internships

Project Management Intern, Government Tool Room and Training Centre

Feb 2025 – April 2025

- Coordinated 3+ cross-functional teams to streamline task delegation and ensure on-time delivery of 2+ projects.
- Monitored and tracked project progress, reducing bottlenecks and improving execution efficiency by 20
- Contributed to end-to-end execution of multiple software projects, gaining practical exposure to team leadership and delivery cycles.

Intern, Trustworthy LLC

May 2024 – Oct 2024

- Developed the end-to-end onboarding flow, improving user activation and reducing drop-offs by 25
- Integrated AWS SES to enable scalable email communication, handling 100+ emails/day.
- Tools Used: Next.js, NestJS, AWS, ShadCN

SDE Intern (Frontend) , DeepByte Technology, Bengaluru

Oct 2023 – Nov 2023

- Played a key role in developing the user interface for an online shopping platform.
- Led the design of a comprehensive information architecture for a client website
- Tools Used: React, TypeScript, SCSS, Draw.io

Projects

Medic AI

- Developed an advanced healthcare AI system for malaria detection with a custom CNN and created predictive models for multiple diseases using Random Forest, and integrated Generative AI for robust patient diagnosis.
- Tools Used: Python, TensorFlow, Scikit-learn, Flask, Gemini 1.5 Flash

Student Track AI

- Designed an innovative predictive model to monitor student performance using historical academic data, enabling educational institutions to identify at-risk students and implement timely, data-driven interventions.
- Tools Used: Python, Flask, Pandas, Matplotlib, Scikit-learn, AWS

Certificates

Mathematics for Machine Learning and Data Science	DeepLearning.AI
CS107: C++ Programming	Saylor Academy
Practical Guide to Python	FrontendMasters
SQL	365 Data Science
Machine Learning in Python	365 Data Science

Education

BE in Artificial Intelligence and Machine Learning RNS Institute of Technology	CGPA: 8.94 2021 – 2025
Class 12 Vagdevi Pre University College	Grade: 94.5 % 2021
Class 10 Prajna Bharathi High School	Grade: 95.6 % 2019

Positions of Responsibility

Technical Head InnovAIT-ON RNSIT	Nov 2023 - May 2025
Organized and led numerous high-impact technical events, delivering engaging sessions on web development, data analysis, and machine learning to over 100 participants, empowering them with valuable skills and insights for the tech world
