Technologies

Languages: Python, C++, JavaScript, SQL

Web Development Libraries: React JS

Data Science Libraries: NumPy, Matplotlib, Pandas, Scikit-learn

Version Control: Git / GitHub

Cloud Platform: Amazon Web Service (SES, CodePipeline, EBS, S3, EC2)

Experience

Intern, Trustworthy LLC

May 2024 – Oct 2024

- Developed the complete onboarding flow, LinkedIn integration for autofill functionality in forms. Integrated AWS SES for email communication, implemented social network and email sharing features, and built reusable UI components.
- Tools Used: Next.js, NestJS, AWS, ShadCN

SDE Intern (Frontend) , DeepByte Technology, Bengaluru

Oct 2023 – Nov 2023

- Played a key role in building the user interface for an online shopping platform and spearheaded the development of a comprehensive information architecture of a website for a client.
- Tools Used: React, TypeScript, SCSS, Draw.io

Projects

AI Amatya

amatya.onrender.com

- Developed an advanced document analysis and information retrieval system, focusing on PDF processing and providing an intuitive user interface.
- Tools Used: Python, Flask, Natural Language Processing, Generative AI

Medic AI

medico-ai-d1z0.onrender.com

- Developed an advanced healthcare AI system for malaria detection with a custom CNN and created predictive models for multiple diseases using Random Forest, and integrated Generative AI for robust patient diagnosis.
- Tools Used: Python, TensorFlow, Scikit-learn, Flask, Gemini 1.5 Flash

Student Track AI

testmarksprediction.ap-south-1.elasticbeanstalk.com

- Designed an innovative predictive model to monitor student performance using historical academic data, enabling educational institutions to identify at-risk students and implement timely, data-driven interventions.
- Tools Used: Python, Flask, Pandas, Matplotlib, Scikit-learn, AWS

Farm-Connect

github.com/amoghbharadwaj21/Farm.Connect

- Developed a software solution that revolutionizes inventory management for agricultural businesses. With its intuitive design, it allows farmers and agricultural companies to easily track and manage their crop inventory.
- Tools Used: MySQL, Express.js, React.js, Node.js, SCSS

Education

BE in Artificial Intelligence and Machine Learning | RNS Institute of Technology

CGPA: 8.73 | 2021 – Present

Class 12 | Vagdevi Pre University College

Grade: 94.5 % | 2021

Class 10 | Prajna Bharathi High School

Grade: 95.6 % | 2019

Positions of Responsibility

Technical Head | InnovAIT-ON | RNSIT

Nov 2023 - Present

Organized and led numerous high-impact technical events, delivering engaging sessions on web development, data analysis, and machine learning to over 100 participants, empowering them with valuable skills and insights for the tech world
